🇪🇹 Ethiopian 📍 Addis Ababa, Ethiopia

👤 PROFILE

Full-stack developer and computer science graduate with hands-on experience building responsive, full-stack web applications. Skilled in designing complete systems. Strong track record of independently shipping and deploying production-quality projects.

🧠 SKILLS

Frontend

- Next.js, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend

- Next.js API Routes, Node.js, RESTful APIs, BetterAuth, Server-Side Rendering (SSR), Static Site Generation (SSG)

Database

- PostgreSQL, MongoDB, Prisma ORM, CRUD Operations

📁 PROFESSIONAL EXPERIENCE

fullstack developer

EOTCOpenSource

01/2026 – Present
Addis Ababa

Debre Tabor Debre Leulnat Medhanealem Website (Team Project, Unpaid) 2026 - Collaborated with a teammate to build and redesign a church school website end-to-end, handling backend and full-stack development - Implemented an illuminated-manuscript-inspired UI using Next.js and Tailwind CSS

Frontend Developer

Sisay Begena Musical Instruments Training Institute

11/2025 – 01/2026

Designed and implemented a responsive, user-friendly About page for Sisay Begena, showcasing the institution's mission and Ethiopian cultural heritage

📁 PROJECTS

Wegie AI

Amharic Subtitle Generator

- Built an AI-powered tool that automatically generates accurate Amharic subtitles for videos and audio in seconds - Solved the problem of manual Amharic transcription being slow and error-prone due to limited tool support for the script
- Implemented media upload and processing for video (MP4, MOV) and audio (MP3, WAV, M4A) formats
- Built with Next.js and Python for the AI/full-stack processing pipeline

Adwa AI

RAG-Powered Ethiopian History Platform

- Built an educational platform that brings the Battle of Adwa to life through RAG-powered AI, letting users chat with historical figures and explore tactical strategy
- Solved the lack of an immersive digital experience for Ethiopian history by pairing conversational AI with archival depth
- Personally built the core AI/RAG logic, including keeping the AI consistently "in character" as historical figures — the hardest technical challenge on the project
- Built with React, TypeScript, Node.js, and Groq AI

Agazian

Ge'ez Learning Website

- Built a Ge'ez learning platform with authentication, an admin dashboard, and a quiz system
- Implemented user roles for managing courses and content using Next.js and MongoDB
- Designed a responsive UI with Tailwind CSS in a glassmorphism style

EDUCATION

B.Sc. in Computer Science
Addis Ababa University [↗](#)

2021 – 2026

CERTIFICATES

Meles Zenawi Foundation [↗](#)
Completed a comprehensive program in web and mobile app development, cognitive skills, and UAV technology, gaining hands-on experience with modern digital tools.

Addis Coders Program [↗](#)
Completed a 4-week intensive program, gaining hands-on experience in Python, problem-solving, and algorithms.

LANGUAGES

English
